

# The Society of Indonesian Science Journalists

Jakarta, 30 June 2017

## To Whom It May Concern

I am honored to serve as a reference for **Harry Surjadi** as requested in applying for WFSJ board member.

I have known Harry Surjadi in 2013 when Harry was one of the Group Leaders for SjCOOP Asia, WFSJ program. After the SjCOOP Asia ended, Harry, all the alumni and I – we found the Society of Indonesian Science Journalists (SISJ) in 2014. SISJ is a member of WFSJ.

I know Harry has been consistently specialized on environment and science reporting since he started working as journalist in 1988. In 2006, he found the Society of Indonesian Environmental Journalists (SIEJ). He wrote environmental and science stories for national and international media for years.

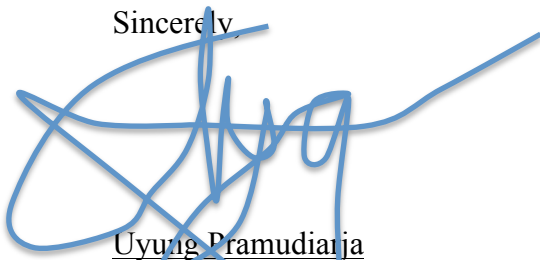

In SISJ we are discussing the possibilities to help other ASEAN member countries to establish their science journalist organizations and also a forum of science journalists in Asia.

SISJ is fully support him when he told us that he would apply for the WFSJ board member. I believe Harry has capability and capacity to help WFSJ in fulfilling the ideas.

Therefore with absolutely no reservations, I strongly recommend Harry for the board member of WFSJ.

Please feel free to contact me with any questions you might have. And good luck with your decision.

Sincerely,

Uyung Pramudiatja  
Chairman of SISJ Board
