

October 3, 2024.

Dear WFSJ Nomination Committee,

I am pleased to write this letter of recommendation for *Agatha Ngotho* in support of her candidacy for a board member position at the World Federation of Science Journalists (WFSJ). She is one of Kenya's leading and most experienced health and science journalists.

As a Science Writer at Radio Africa Group-The Star Publication, she has consistently demonstrated an unwavering commitment to advancing science journalism and fostering a deeper public understanding of scientific issues.

Agatha has excelled in her career having won an award on Agriculture Biotechnology Reporting, and just recently, a grant from Science Africa to report on Health and Climate Change.

She possesses a keen understanding of the challenges and opportunities facing science journalists today especially in developing nations. Her ability to engage diverse stakeholders would make Agatha an invaluable asset to the WFSJ board.

Having been involved with WFSJ I strongly recommend Agatha Ngotho for the board member position at WFSJ. Her passion for science journalism, coupled with her extensive experience will undoubtedly contribute to the continued success and mission of the organization.

Thank you for considering this outstanding candidate and be free to make further enquiries.

Sincerely,

Otula Owuor
